

TORO is a technology business company leader in the NFC Mobile Ecosystem. We are pioneers in enabling commerce with mobile phones and a global reference in the Near Field Communication. **TORO** provides the Mobile Wallet Infrastructure and its associated systems, services and rules to make electronic transactions with the mobile phone happen between millions of consumers, retailers, businesses and governments.

TORO's Team is formed by top level research engineers and specialists in the area. You will work with the top minds in technology to help create the greatest things for the future of the mobile commerce. Our crew is made of multiple nationalities, where each team member brings a special part to make a great multicultural environment. We provide continuous workshops, researches and full contact with the main engineering actors of the present and the future of the NFC.

We have 1 position for **Test Automation Specialist** to join our office in **Barcelona**.

What you need for this position?

- Excellent team skills
- 3+ years of experience in the fields of QA or QC
- Experience in testing mobile applications, especially Android.
- Knowledge of automation testing tools for mobile apps (Appium, Monkeyrunner)
- Python programming skills
- Good level of English (spoken and written)
- Well organized, attention to details and able to enforce processes
- Experience in writing test plans

Experience with the following would be a great plus:

- EMV payments
- Experience with Cucumber or BDD frameworks
- Experience in API testing
- Jira, Confluence, Jenkins, SonarQube
- Jmeter
- Spanish

What you'll be doing?

- Work in a cross-functional scrum team involved in the whole development process.
- Ensure a high quality level of Toro's products.
- Development of automated testing
- Perform software testing, defects tracking and quality control. Testing coverage include technical and functional testing of mobile applications (Wallet) and server applications (Wallet Manager and Business Intelligence system). Validate fixes and absence of regressions before deployments to production. Provide support to reproduce bugs

If you are a good fit for this position and are interested in working in an international and dynamic environment, please send your English resume to contact@toro-eu.com
